CAREER OBJECTIVE

Detail-oriented QA Engineer with strong foundation in software testing, automation, and quality assurance. Skilled in identifying bugs, writing test cases, and ensuring application stability through manual and automated testing. Seeking an opportunity to contribute to delivering high-quality software products.

EDUCATION

Central University of Haryana
Masters in Computer Applications

Haryana, India
Aug. 2024 – June 2026

PROJECTS

Crowd Funding Platform | *Python, Django, Django React Framework, SQLite* Jan 2026 – March 2026

- Designed and developed a crowdfunding web application enabling users to create and fund campaigns.
- Built database schema using SQLite to manage users, campaigns, and transactions.
- Developed core features such as **campaign creation, funding workflow, and contribution tracking** .
- Designed and executed **15+ test cases** for login, campaign creation, and funding workflows
- Identified and documented defects during testing with validation of data flow and UI behavior .
-

LOGIN Automation System | *Python, Selenium WebDriver ,pytest,HTML,CSS,JS* April-2026

- Automated login functionality of a web application using Selenium WebDriver
- Created reusable test scripts using Selenium WebDriver with Python.
- Implemented robust locator strategies (XPath, ID, Name) for dynamic elements.
- Covered **positive and negative test scenarios** (valid, invalid, empty inputs)
- Performed **functional and regression testing** to ensure application stability.
- Automated **10+ test scenarios** for login functionality .
- Integrated test execution using **Pytest framework** .
- Reduced manual testing effort by automating repetitive login scenarios.

QA Testing Experience (Project-Based)

Automation & Manual Testing Practice

- Designed and executed **20+ test cases** for web application features including login and user workflows.
- Performed manual testing to identify **UI, functional, and validation defects across modules** .
- Documented bugs with proper steps, expected vs actual results (Jira-style reporting).
- Conducted **API testing using Postman** for validating backend responses.
- Automated **10+ test scenarios** using Selenium WebDriver with Python and Pytest .
- Performed **regression testing** after bug fixes to ensure stability.
- Created and maintained test documentation ensuring better test coverage and traceability

CERTIFICATES / ACHIEVEMENTS

Python Programming Certification – Scalar Academy

SQL (Basic) Certification – HackerRank

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, HTML, CSS

Frameworks/Libraries: Django,Streamlit,Selenium

DataBase: MySQL,SQLITE

Tools: Git, Github, VS Code, Postman

Testing Skills:: Manual Testing, Automation Testing, Test Case Design, Functional Testing, Regression Testing, API Testing

Core CS: DSA (Basic), OOP, OS, CN, DBMS .

Software Practices: SDLC, Agile, Scrum, Debugging, Code Reviews
