CAREER OBJECTIVE

Software Engineer with strong foundations in data structures, algorithms, and software engineering, experienced in building scalable, production-ready systems, writing high-quality code with test coverage, and solving complex technical problems in fast-paced, product-driven environments.

EDUCATION

Hemvati Nandan Bahuguna Garhwal University

Bachelor of Technology in Information Technology

Srinagar, India

Nov. 2022 – June 2026

EXPERIENCE

Software Developer Intern

June 2025 – September 2025

PPSANT Textile Pvt. Ltd.

Remote

- Developed and optimized RESTful APIs using modern frameworks, focusing on performance, scalability, and maintainable software engineering practices.
- Optimized query logic, reducing API response time by **60%** and database load by **35%**.
- Worked closely with client stakeholders to understand integration needs and implement API-based solutions in a SaaS-like delivery model.
- Wrote clean, modular, and production-quality code with emphasis on debugging, code readability, and long-term maintainability.

PROJECTS

SafeKeyz | *React.js, Node.js, Express.js, MongoDB*

April 2025 – June 2025

- Designed and developed a secure MERN stack web application for storing and managing sensitive credentials.
- Stores 20+ types of confidential data, including online IDs, passwords, API keys, bank locker keys, and more.
- Utilizes AES-256 encryption to secure stored data, providing **99%+ protection** against unauthorized access.
- Focused on secure system design, data analysis, and backend performance while following industry-standard software engineering principles.

HRMS (HR Management System) | *React.js, Node.js, Express.js, MYSQL*

October 2025 – January 2026

- Engineered RESTful API architecture supporting 1000+ concurrent users, handling employee management, attendance tracking, task assignment, and real-time messaging operations.
- Built modular Express.js controllers and services for session management, notifications, uptime tracking, and project workflows following MVC architecture.
- Containerized backend using Docker and implemented CI/CD pipelines via GitHub Actions, achieving 99.9% uptime and automated deployment workflows.

CERTIFICATES / ACHIEVEMENTS

Knight (1924+) on LeetCode

[profile link](#)

3 Star (1630+) on CodeChef

[profile link](#)

Pupil (1375+) rated on CodeForces

[profile link](#)

Ranked 1 on GFG among college peers

Semifinalist – Tata Imagination Challenge 2025

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, C, C++, SQL, HTML, CSS

Frameworks/Libraries: React, Node.js, Express.js, Django

DataBase: MongoDB, MySQL

Developer Tools: Git, Github, GitHub Actions (CI/CD), Linux, VS Code, POSTMAN, Docker, Unit Testing (basic), API Testing

Core CS: Data Structures and Algorithms, OOP, OS, CN, DBMS, Software Engineering Principles, Debugging, Code Reviews, Test Coverage, System Design Basics.

Software Practices: SaaS Implementation, Client Onboarding, REST API Integration, Webhooks, Agile, Scrum, SDLC, Microservices Architecture
